

Manual Cleaning Solution for Stenter Machines

Steinemann CVS solved the waste management issues of Döhler in Brazil, a renowned manufacturer of bedding, tablecloths & towels. Döhler is amongst many customers with a wide application of Steinemann's products and we have come up with an efficient solution for the cleaning of the filters from the Stenter machines. After installing our CVS manual cleaning, they confirm that it was a game changer for this multiple daily task.

Key advantages of CVS's manual cleaning for Stenter machines:

- Clean the filter screen with a much higher efficiency
- Less machine downtime
- Guarantees higher productivity
- Easy handling
- Positive effect on employee's productivity
- Clean environment
- Centralize the waste no more issues with waste logistics

Photovoltaic system: 1'924 modules = 3'146 m² | plant performance: DC 442.24 kWp | AC 372.80 kVA
